

CONTENTS

<i>Preface</i>	vii
1. Introduction: Law, Information Technology, and Artificial Intelligence	1
ANJA OSKAMP AND ARNO R. LODDER	
1.1. Information Technology and Lawyers	1
1.2. Information Technology and Law	2
1.2.1. Information Technology Law	3
1.2.2. IT for Lawyers	3
1.2.3. Technology and the Involvement of Lawyers	4
1.3. Some Basic Concepts	4
1.4. Taxonomy of Technology Support for Lawyers	6
1.4.1. Three Different Taxonomies	6
1.4.2. Knowledge Management and Taxonomies	7
1.5. Artificial Intelligence	8
1.5.1. Problem Solving	9
1.5.2. Modeling Tasks and Processes	9
1.5.3. Games	9
1.5.4. Communication	10
1.5.5. Perception	10
1.5.6. Robotica	10
1.5.7. Conclusion	11
1.6. AI and Law	11
1.6.1. Information Retrieval 1950s	11
1.6.2. Knowledge Systems and Argumentation 1980s	12
1.6.3. Organizations and Conferences	12
1.7. Convergence in it and Law	13
1.7.1. Online Dispute Resolution	14
1.7.2. Intelligent Agents	15
1.7.3. Validation	16
1.7.4. Courtroom Technology or IT Support of the Judiciary	18
1.7.5. The European Countries	18
1.7.6. Australia, Singapore and Venezuela	19
1.7.7. Case Management: Road to Success	19
1.8. Structure of the Book	20
2. Case-Based Reasoning	23
KEVIN ASHLEY	
2.1. Introduction: A Computerized Case-Based Legal Assistant	23
2.2. Desiderata for a Computerized Case-Based Legal Assistant	25

2.3. A Computer Program Compares Legal Cases on Their Facts	27
2.4. Legal IR Case Retrieval vs. Case Comparison	30
2.5. Automating Case-Based Comparison, Inference, and Argument	35
2.6. Dimensional Case Comparison, Inference, and Argument	37
2.7. Case Comparison, Inference, and Argument With Ebes	43
2.8. Integrating Case-Based and Logical Inference	46
2.9. Prediction in Computerized Case-Based Legal Assistants	52
2.10. Connecting With Full-Text Legal Information Retrieval Tools	56
2.11. Conclusion: Synthesizing a Computerized Case-Based Legal Assistant: How Far Off?	58
3. Argumentation	61
TREVOR BENCH-CAPON AND HENRY PRAKKEN	
3.1. Introduction	61
3.2. Proof and Argument	62
3.3. Early Systems For Legal Argumentation	63
3.3.1. Conflicting Interpretations	63
3.3.2. Reasoning with Precedents	64
3.4. Logical Accounts of Reasoning Under Disagreement	66
3.4.1. Reasoning about Conflicting Rules	67
3.4.2. Other Arguments about Rules	69
3.5. Dialogue and Mediation Systems	71
3.6. Tactics for Dispute	73
3.7. Argument Schemes	74
3.8. Systems to Structure Argument	75
3.9. Prospects for Practical Realisation	77
3.10. Concluding Remarks	79
4. Knowledge Discovery from Legal Databases—Using Neural Networks and Data Mining to Build Legal Decision Support Systems	81
ANDREW STRANIERI AND JOHN ZELEZNIKOW	
4.1. Introduction	81
4.2. Differences Between Legal and Other Data	82
4.2.1. Open Texture and Discretion	82
4.2.2. Landmark and Commonplace Cases	84
4.2.3. Stare Decisis	87
4.3. Phases in the Knowledge Discovery From Database Process	89
4.3.1. Data Selection	89
4.3.2. Data PreProcessing	90
4.3.3. Data Transformation	90
4.3.4. Data Mining and Evaluation	93
4.4. Neural Networks	94
4.4.1. Feed Forward Networks	95
4.4.2. Neural Networks and Defeasible Rules	99
4.4.3. Neural Networks and Vague Terms	100
4.4.4. Neural Networks in Law	102

CONTENTS

vii

4.5. Knowledge Discovery from Database Techniques	103
4.5.1. Classification	104
4.5.2. Clustering and Text Mining	111
4.5.3. Time Series Analysis	112
4.5.4. Association Rules	113
4.6. Limitations of Knowledge Discovery From Databases	115
4.7. Conclusion	116
5. Improving Access to Legal Information: How Drafting Systems Help	119
MARIE-FRANCINE MOENS	
5.1. Introduction	119
5.2. Legal Information	120
5.3. State of the Art of Legal Drafting Systems	122
5.4. State of the Art of Legal Information Retrieval Systems	127
5.5. Legal Drafting Improves Access to Legal Information	129
5.5.1. Drafting and Traditional Retrieval	130
5.5.2. Interactive Question Answering System	132
5.5.3. Future Directions	134
5.6. Conclusions	135
6. Internet, WWW, and Beyond	137
GERALD QUIRCHMAYR	
6.1. Aim, Organization, and Background of this Chapter	137
6.2. What the Internet Means for Lawyers and How it Has Contributed to Changing the Work Environment of Lawyers	137
6.3. The Internet as Increasingly Important Source of Information	138
6.4. Searching For Information on the Internet	139
6.5. Providing Information and Doing Business on the Internet	142
6.6. The Language of the WWW	143
6.7. E-Administration—A Profound Change For the Legal Profession	147
6.8. Integrating the Internet with Traditional Desktop-Based Office Environments and Databases	151
6.9. Emerging Technologies: Mobile, Ubiquitous, and Pervasive Systems	154
6.10. Security and Stability: Concerns for Internet-Based Infrastructures	155
6.11. Mobile Lawyers and Live Spaces: A Look at “Technology Without Walls”	158
6.12. Selected Best Practice Examples	160
6.13. Conclusion	163
7. Artificial Intelligence in the Real Legal Workplace	165
MARC LAURITSEN	
7.1. Nature and Artifice	165
7.2. Three Kinds of Knowledge Technology	166
7.2.1. Storage and Transport	166

7.2.2. Extending Humans	166
7.2.3. Independent Work	167
7.2.4. Law Office Knowledge Tool Examples	167
7.3. AI More Specifically	168
7.3.1. What Does It Mean To Be “Smart”?	169
7.3.2. Some Distinctions	169
7.4. AI in Law	170
7.4.1. Legal Uses of Nonlegal AI	170
7.4.2. Legal Uses of Legal AI	172
7.5. Obstacles and Opportunities	173
7.5.1. Theory and Practice	173
7.5.2. The Legal Industry	173
7.5.3. Signs of Change	174
7.6. Room for Improvement	175
<i>Bibliography</i>	177
<i>Index</i>	191
